Basics /  
pegboard hole diameter

## What is ROSy?

ROSy – Rotterdam System – is a modular interior system based on a pegboard pattern. It comes in a variety of parts and pieces which can be joined for almost any need.

Build your own working structures, shelves, storage systems, exhibition booths, fair structures, shop systems... and change them around quickly to suit your needs!

ROSy's basic material is plywood, but almost any other material or object can be integrated into the system – as long as you can put a 20mm hole in it.

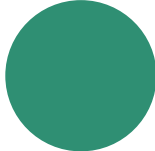

ROSy is lightweight, flexible and works tool-free.

This catalogue gives an overview of the ROSy product range that has worked out so far and how, from our projects and experiments, it has developed up until now.

Your ideas and input are very welcome!

# The Workstation

In its most basic form the workstation is a table and a backboard on wheels – from here there are infinite possibilities.

The Workstation suits flexible office solutions as well as your home-office environment or the back office of your shop.

You can choose between different colours for the tabletops or the side panels. See Materials (pp. 44–49). All accessories are interchangeable, so feel free to create your own station!

On the following pages you'll find our favourite combinations:

## **1 The Brainstormer**

## **2 The Graphic Nerd**

## **3 The Simplicist**

## **4 The Collaborator**

### **Workstation features:**

- Shelves, lamps, plugs, whiteboards and other accessories possible
- Work and apply accessories from both sides
- Several tables can be interconnected for groups
- Backboard can be detached and used separately for presentations
- Quick and tool-free building and changing

# The Room Divider

The Room Divider is extremely versatile and can be combined with almost anything from the ROSy family. Which makes it even more difficult to present a selection here!

We offer two standard sizes – big and small, coming with a single or a double pegboard.

The Room Divider is most often used in offices to divide larger spaces permanently or very temporarily; they are easy to move around for team meetings or to create new group spaces. Yet they are applicable in many other environments: Think of home-offices, shops/showrooms, exhibitions, events and more.

Apply accessories that are necessary for you – more acoustic requirements or presentation items? It can also become a wardrobe or a bookshelf...

On the following pages you'll find our favourite combinations:

## 1 Big Maxi

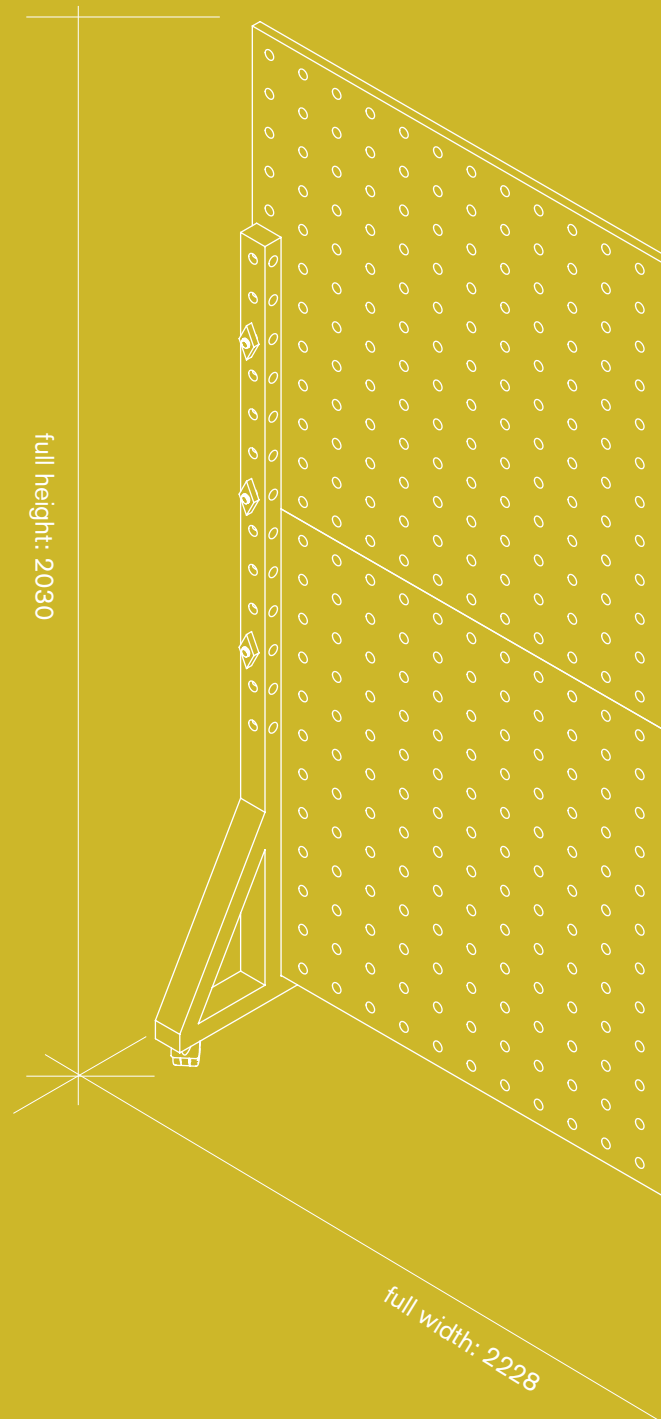

## 2 Big Half

## 3 Small Maxi

## 4 Small Half

### Room Divider features:

- Really easy to move
- Quick and tool-free building and changing
- Work and apply accessories from both sides! Double-sided pegboard possible for easier application
- Outstanding acoustic abilities when combined with ROSy acoustic panel and thanks to the sound wave-shaping abilities of the holes in the pegboard

## **How it works**

Now that we've shown you all the ingredients, here's an in-depth chapter on our basic connectors which hold everything together.

ROSy and its parts are compatible with the OpenStructures system.

Find out more about the materials we use and colour options in the Materials chapter.

**The Connectors**

**Materials**

**Finishes**

# The Connectors

The ROSy System works with 3 different types of connectors which you'll find on the following page. They work tool-free, so you can apply and take them out by hand. All wooden connectors are handmade by us. Like the other wooden ROSy parts, they get oiled and polished two times.

## 1 Diamond Screw

### 2 Bolt

### 3 Duo

# 1 Diamond Screw

Threaded bolt with diamond nut

The Diamond Screw connects ROSy beams and pegboards, shelves and other ROSy items. It works like a common nut and bolt.

#### Material diamond

Multiplex 18mm

#### Material screw

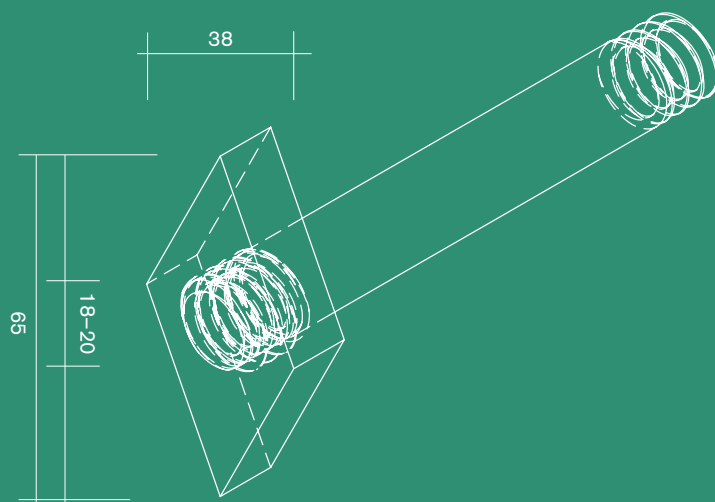

beech wood 19/20mm

#### Dimensions diamond

65 x 18 x 38mm

#### Dimensions screw

18/20mm diameter – 1800mm length

**Diamond Screw/**  
Connecting the Room Divider

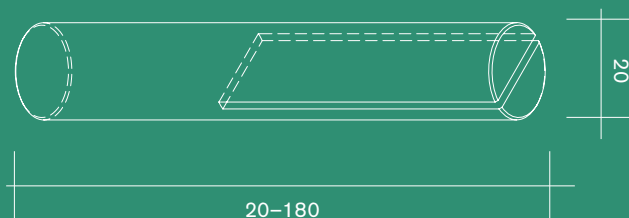

## 2 Bolt

### Wooden bolt with slot

Bolt attaches accessories like lights or the ROSy Power Block to a pegboard. It is slotted in one end to allow for easy fixation and removal in the pegboard.

**Material**  
Beech wood

**Dimensions**  
Diameter 19 or 20mm  
Length 20–1800mm

**Bolt** / Applied to a power block

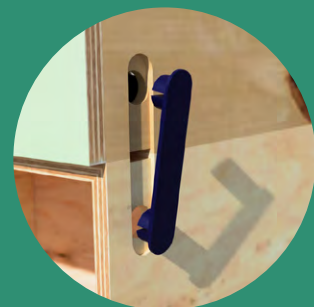

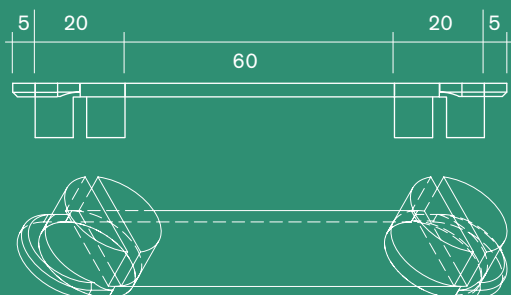

## 3 Duo

### 3D Print or cast connector

Duo is a bespoke 3d printed/cast piece that makes flat connections possible, for example applied to ROSy cubes (p. 34).

**Material**  
polyurethane, natural resin or recycled plastic

**Dimensions**  
60 x 20mm

**Duo** / Connecting two ROSy Cubes

# Pegboard Materials and Finishes

As a standard we finish the plywood pegboard with a transparent hardwax oil based on natural oils like linseed, soy and sunflower oil from responsible sources. It creates a smooth and water-repellend surface.

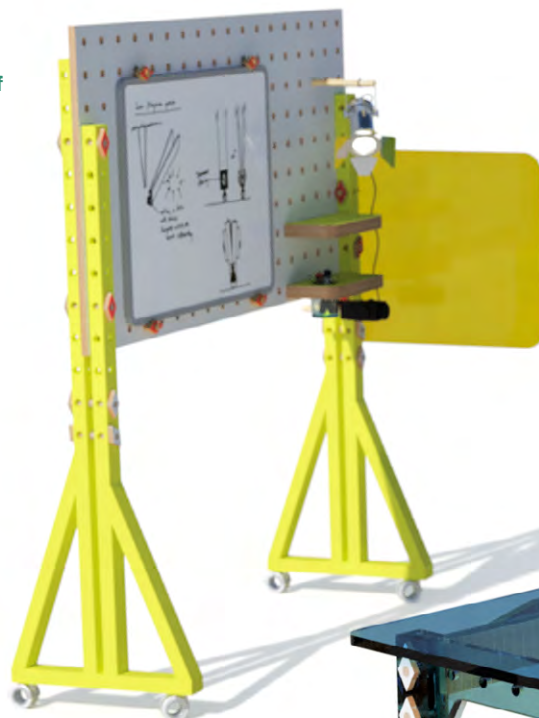

We can also offer water based stains with natural pigments or a finish with an (eco) lacquer, for example from the RAL series. Please note that prices may vary slightly due to the requested finish.

Feel free to explore different palettes and reach out to us with your wishes!

# The ROSy Life Cycle

## **1** Order what you need online

Order what you need online or speak to us about a bespoke design for your space.

## **2** Localised manufacturing and refurbishment

All our materials are from responsible sources or refurbished stock. Your furniture is then created in local manufacturing facilities and workshops.

## **3** Modularity means adaptability

The modular system means that your ROSy furniture can grow or shrink based on your situation and live with you for years to come.

## **4** End of life beginning of another

Your ROSy furniture is built for longevity but if your situation changes so much that you no longer have a use for it, then we will buy it back from you, completing the cycle.

# Shipment, Warranty, Assembly, Pricing

## **Shipment:**

We ship in packages and on pallets with the most efficient forwarder based on your location. Prices are transparently made due to weight/volume and distance.

## **Assembly:**

ROSy is a self build-up system. You can easily and without tools build up all objects by following a simple manual.

For custom-made or more complex interior build-up we are happy to assist you, please reach out.

## **Warranties:**

We give warranty on the proper function and usage of ROSy objects as intended in catalogues, the website and manuals, and guarantee that there is no material malfunction of any kind.

**Warranty for wooden furniture:** 15 years

**Warranty for non wooden parts:** 10 years

## **Warranty for electric appliances**

(without light bulbs or tubes of any kind): 5 years

## **ROSy Life Cycle(s):**

ROSy is a robust system that will accompany you for many years. It will grow and shrink with your needs and wander through your work and life environments. In case you cannot find any suiting use for it anymore some day, don't recycle it, we'll buy it back from you! ROSy can be refurbished and have a new life. Read the conditions on our website and get in touch.

## **No price guarantee:**

Our pricing is very sharp – we want to provide ROSy for the best possible price at any time. Unfortunately, the current raw material market is too volatile to be able to guarantee prices in this catalogue. Please check actual prices in our online shop or by reaching out. Errors and omissions are excepted.

# About the makers

We are radical and we are playful.  
We craft unicums and modular systems,  
situations and events. We get you  
out of your comfort zone. We work  
on collaborative processes with you.  
We develop integrated designs. We  
improvise. We reuse and recycle.  
We offer you a different view on  
your environment.

We see design as a collaborative process  
in which, together with you, we reimagine  
what our surroundings can be.

With this catalogue we offer access to  
the idea of a flexible, multifunctional,  
sustainable, playful and resource-  
efficient system that fits in all kinds of  
environments:
